

THAT[®]
CONFERENCE

**You
Scare me**

Olivia Shannon

BRYAN SHANNON

Personal and Professional

- Iowa resident born and raised
- Luckily Married 20+ years
- Proud father of 2 daughters
- 15 Years in Customer Service
- Became a BA in 2013
- Became a Developer in 2018
- Polyglot, but primarily C# and Salesforce

Project Highlights

- Purpose:
 - Tell a story
 - Neurodiversity advocacy
- Challenge:
 - Articulation
 - Experience
- Assistance: AI
 - Focus
 - Skill Complement
 - Collaboration

SPECIAL THANKS TO ALL OUR AWESOME CAMP SPONSORS!

TRANSLATING ADHD

**How can I
expand this?**

TRANSLATING
ADHD

Get Perspective

TRANSLATING ADHD

Get Perspective

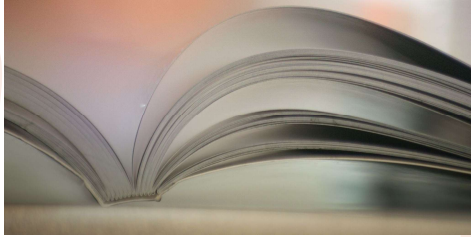

How can people “Get Perspective”

TRANSLATING
ADHD

Write a
book

Storytelling transports us to teachable moments

How can I write a book

- I have a host of reasons not to do this
- If you have ADHD you might understand some of these
- If not, you might still get some of my hesitations about writing
- ChatGPT is great at language, what if it can complement my skills

TRANSLATING
ADHD

**Stories are
naturally
iterative**

iterative**

BASIC TERMINOLOGY

Artificial Intelligence
Machine Learning

Large Language Model

- AI/ML applied to language
- Model based on a large set of language input
- Effective at “predicting most likely next set of text”

Intelligence Augmentation

- Tool to Enhance our Intelligence

ChatGPT

- Generative
- Pretrained
- Transformer

Erin

- Discord Bot
- Build on ChatGPT
- Discord thread = Memory

INCLUSIVE STORY WRITING

Step					
1	Start with a Subject	Lifelike Scenario or Theme	Significant Event or Personal Journey	Divisive Issue	Any Subject that could have multiple points of view
2	Who	Character Creation	2 or more characters	2 or more perspectives	Some characters may agree and you may have all characters start with different positions
2	Who	Age, appearance	Personality	Strengths	Challenges
3	Scenario	With characters defined	Prompt the AI to write a passage	You can just say Character A meets and talks to Character B and see what comes out	The more direction you give, the more you steer it towards your vision

PEAKS AND VALLEYS

- **Pros**

- Tool to help, not replace, humans
- Provides results from different thinking modes
- Translate between concepts and long passages
- Evolving to be able to connect to API's and plug-ins to help with limited "knowledge"

Cons

- Limited timeline of "knowledge"
- Makes false statements with extreme confidence
- Data driven bias
- Enhances user's existing bias
- Large Language Models do not have "Knowledge"

TOOLS AND TAKEAWAYS

- **Takeaways**

- Be Curious
 - Embrace Intelligence Augmentation
 - AI cannot be ignored
 - Exploring diverse perspectives
 - Builds empathy
 - Brings us closer to the truth
 - X
 - Z

Tools

- Translating ADHD
- Discord Server for this chat
- Meet Erin – Erin.ac
 - Site to learn about Erin the discord bot
- GeneratedBy.com
 - Prompt Engineering tool
- All About AI YouTube Channel
